

Alex Fan

Cat Developer

alexander.fan1991@gmail.com — [0721819586](tel:0721819586) — [LinkedIn](#) — github.com/someone

PROFILE SUMMARY

Full stack developer with 5 years of experience building scalable web applications across cloud environments. Proven track record in designing CI/CD pipelines, containerized deployments, and REST APIs for production systems serving thousands of users. Comfortable working across the full stack — from React frontends to Spring Boot backends — and experienced in cross-functional agile teams. Passionate about clean code, automation, and continuous learning.

TECHNICAL SKILLS

- **CI/CD Tools:** GitHub Actions, Azure DevOps, Jenkins
- **Cloud:** Azure (AZ-900 certified), AWS (Solutions Architect Associate)
- **Containerization:** Docker, Kubernetes, Helm
- **Infrastructure as Code:** Terraform, Ansible
- **Scripting:** Python, Bash, PowerShell
- **Monitoring:** Prometheus, Grafana, Datadog
- **Source Control:** Git, GitHub, GitLab
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Security:** Secure coding practices, OAuth 2.0, Azure Key Vault
- **Web Development:** React.js, TypeScript, Next.js, Spring Boot

PROFESSIONAL EXPERIENCE

Example Corp, Stockholm: *Senior Full Stack Developer, Jan 2022 - Present*

- Designed and implemented CI/CD pipelines using GitHub Actions and Azure DevOps, reducing deployment time by 50%.
- Provisioned cloud infrastructure on Azure with Terraform, enabling consistent and repeatable deployments across staging and production.
- Containerized microservices with Docker and orchestrated them with Kubernetes, supporting zero-downtime rolling releases.
- Led migration of a monolithic Java application to a microservices architecture, improving system scalability and team autonomy.
- Introduced Prometheus and Grafana dashboards for real-time monitoring, cutting mean time to detection (MTTD) by 40%.

WebSolutions AB, Gothenburg: *Full Stack Developer, Jun 2020 - Dec 2021*

- Built and maintained REST APIs using Spring Boot, serving a React.js frontend used by over 10,000 active users.
- Migrated on-premises SQL Server databases to Azure SQL Database, reducing operational overhead and improving query performance.
- Secured application secrets using Azure Key Vault, achieving compliance with company data handling policies.
- Automated integration testing in the CI pipeline, cutting regression bugs reaching production by 35%.
- Collaborated in a cross-functional agile team of 8, taking part in sprint planning, code reviews, and retrospectives.

StartupXYZ, Remote: *Junior Developer, Sep 2019 - May 2020*

- Developed customer-facing features in React.js and TypeScript, improving user engagement metrics by 20%.

- Maintained a Node.js backend connected to a PostgreSQL database, handling data for a SaaS product.
- Set up a GitHub Actions workflow for automated linting, testing, and deployment to AWS EC2.
- Participated in pair programming sessions and adopted TDD practices, raising unit test coverage from 40% to 75%.

Freelance: *Web Developer, Jan 2019 - Aug 2019*

- Delivered five client websites using Next.js and Tailwind CSS, optimised for performance and SEO.
- Integrated Stripe payment API for two e-commerce clients, handling checkout flows and webhook events.
- Deployed projects to AWS and Vercel, configuring custom domains, SSL certificates, and CDN caching.

TechStart AB, Stockholm: *Software Development Intern, Jun 2018 - Aug 2018*

- Assisted in developing internal tooling using Python and Flask, automating manual reporting tasks and saving the team 5+ hours per week.
- Wrote unit tests for existing backend modules, increasing test coverage from 30% to 60%.
- Participated in daily stand-ups and sprint reviews within an agile team of 6 developers.
- Documented REST API endpoints using Swagger, improving onboarding experience for new team members.

Digital Agency X, Gothenburg: *Frontend Development Intern, Jan 2018 - May 2018*

- Built responsive UI components using HTML, CSS, and vanilla JavaScript for three client websites.
- Collaborated with designers to implement pixel-perfect layouts from Figma mockups.
- Optimised page load performance by compressing assets and implementing lazy loading, reducing load time by 30%.
- Gained hands-on experience with Git version control and code review workflows.

HOBBY PROJECTS

OpenShop — E-commerce Platform: *Jan 2023 - Present*

- Building a full-stack e-commerce platform with Next.js (frontend) and Spring Boot (backend) as an open-source learning project.
- Using PostgreSQL for product, order, and user data with a clean domain-driven schema design.
- Implemented JWT authentication, CORS configuration, and role-based access control.
- Containerised with Docker Compose locally; Kubernetes manifests prepared for cloud deployment.
- Source available at github.com/someone/openshop.

WeatherNow — Real-time Weather App: *Mar 2022 - Jun 2022*

- Built a weather web app with Spring Boot backend and vanilla JavaScript frontend.
- Integrated OpenWeatherMap API and OpenCageData API for location-aware forecasts.
- Deployed to Azure App Service with a managed MySQL database; accessible at weathernow.example.com.

CryptoTracker — Mobile App (Xamarin): *Sep 2021 - Dec 2021*

- Developed a cross-platform iOS/Android app in Xamarin.Forms with a .NET backend on Azure App Service.
- Fetched live crypto prices via the CoinGecko API and pushed updates to clients using SignalR.
- Stored portfolio data in Azure Cosmos DB; containerised the backend with Docker Compose.

EDUCATION

Example University, London

BSc Computer Science — 2015–2019

Example Institute of Technology, Online

YH Java Integration Developer — 2020–2021

Example College, Stockholm

YH .NET Cloud Development — 2021–2022

CERTIFICATIONS

- Microsoft Azure Fundamentals AZ-900 (Mar 2022)
- AWS Certified Solutions Architect – Associate (Nov 2022)
- Certified Kubernetes Application Developer – CKAD (Jul 2023)
- HashiCorp Certified: Terraform Associate (Jan 2024)
